EDUCATION

Manipal Institute Of Technology | Udupi, India

2022 - 2026

Bachelor of Technology (B.Tech) in Electrical & Electronics Engineering

EXPERIENCE

Delhivery | Gurgaon, India

Feb 2026 - Ongoing

Product Management Intern | MidMile

DEFCOM (Enterprise B2B Expense Management Platform)

- Led the end-to-end architecture rebuild of a legacy enterprise platform across **4,000+ facilities**, modernizing B2B workflows for Dispatch Centers representing **72% of total platform billing value**.
- Conducted **root-cause analysis** on financial leakage and processing delays, defining the product scope for a real-time compliance engine with dynamic budget caps, **projected to save ₹3.6 Cr annually (10% of total spend)**.
- Collaborated with engineering to integrate **AI-powered OCR via API**, architecting a 5-layer **automated duplicacy checking pipeline** that dropped the time to catch a duplicate invoice from a 3.2-day baseline **down to 0 days**.
- Transformed a 24-step manual form flow into a 3-click auto-populated workflow, **reducing user friction by 87.5%** and saving an estimated **1,062 operational hours per month**.
- Designed and launched an **auto-approval engine** and integrated split-screen receipt viewer, accelerating standard claim approvals by 25-30% and cutting **first-approval turnaround time (TAT) from 7.2 days to 0 days**.

HubEye (MidMile Logistics Dashboard)

- Led the product transition to an **agentic AI platform**, consolidating four fragmented operational tabs into a unified, dynamic spatial workspace for real-time facility monitoring.
- Prototyped **HubEye Intelligence**, an **AI driven copilot** that autonomously diagnoses root cause supply chain bottlenecks, tracing flow breaks from localized inventory aging to delayed truck departures, and surfaces remediation workflows.
- Designed an interactive **digital twin** of facility layouts, enabling operations managers to execute granular drill downs from macro hub metrics to micro-level zone and dock performance for proactive **SLA enforcement**.
- Tracked **product health and operational performance** using Google Analytics (GA4) and Microsoft Clarity, conducting **funnel analysis** to identify and optimize high-drop-off conversion loops within the legacy interface.

SKILLS

- **Product Strategy:** 0 to 1 Lifecycle, B2B SaaS, Root-Cause Analysis, Agile/Scrum.
- **Tech & Architecture:** System Design, API Specifications, Data Pipelines, Git.
- **Growth Analytics:** SQL, Python, A/B Testing, Cohort Analysis, Conversion Optimization.
- **Tools:** Azure DevOps, AWS Quicksight, GA4, Microsoft Clarity.

PROJECTS

Zomato Data Analysis & Predictive Modeling ([Link](#))

Oct 2025 – Nov 2025

- Aggregated and structured an analysis-ready dataset of **9,500 restaurants** to uncover latent user engagement drivers.
- Designed and **evaluated A/B testing hypotheses**, using statistical frameworks (**T-test**) to validate that integrated feature booking directly correlates with top-quartile user satisfaction ratings.
- Deployed a **K-Means clustering algorithm** to perform market segmentation, successfully identifying 4 distinct business clusters to inform targeted roadmap prioritization.

Consumer Growth Analytics ([Link](#))

Sep 2025 – Oct 2025

- Analyzed a **3,900 user dataset** using advanced PostgreSQL to map core revenue drivers, discovering that the "Young Adult" demographic contributed **27% of total revenue**.
- Performed **deep cohort analysis** to isolate a key performance gap where non-subscribers generated **2.7x more revenue** than subscribers.
- Maintained a centralized KPI dashboard tracking **\$233K in revenue and \$59.76 AOV**, translating insights into conversion optimization strategies to boost subscriber retention.

CERTIFICATIONS

- **Become a Solutions Architect (BeSA) Certificate** Issued by AWS Community Initiative
- **Google Data Analytics Professional Certificate** Issued by Google
- **SQL (Advanced) Certificate** Issued by HackerRank
